CHAIN OF CUSTODY

ASBESTOS ANALYSIS – BULK SAMPLES

Notes to the sampler

- 1- A fully filled out chain of custody form should accompany every set of samples brought in for analysis
- 2- Please ensure that all the samples you collect are double-bagged using zip-lock bags and labelled legibly
- 3 – Minimum sample size expected is the size of a coin and the maximum is the size of half a currency note
- 4- Please ensure all the relevant details are furnished on the chain of custody, including contact details
- 5- If very large samples are provided, the sampler is expected to subsample it for the lab
- 6- The lab stores all the samples and associated COCs for 3 months only.
- 7- The electronic certificates and associated worksheets are stored for 3 years only.
